Allowable Subject Matter

2. Claims 1, 3-20, 23-52 allowed.
3. The following is an examiner's statement of reasons for allowance:

The closest prior art is Sato et al (U.S. Patent No. 6,651,0460. Sato et al discloses an optimizing method for optimization, the total number of crew required for flight services and a crew pairing model calculation unit for calculating a fitness of a solution. However Sato et al fail to teach an optimizer engine in electrical communication with an optimizer container and an optimizer data provider for generating a mixed integer programming model and thereafter solving said mixed integer programming model to provide a feasible optimized solution, and for deriving an optimized pilot training plan from said feasible optimized solution, wherein said mixed integer programming model is comprised of an objective function with variables and constraints as recited in independent claim 1.

The closest prior art is Sato et al (U.S. Patent No. 6,651,0460). Sato et al disclose an

optimizing method for optimization, the total number of crew required for flight services and a crew pairing model calculation unit for calculating a fitness of a solution. However Sato et al fail to teach creating variables and constraints from a set of lists, and an MIP (Mix Integer Programming) model, and solving a linear programming relaxation of said MIP Model to generate a first solution with said variables, wherein said MIP Model comprises of an objective function with variable and constraints as recited in independent claim 18.

The closest prior art is Sato et al (U.S. Patent No. 6,651,0460). Sato et al discloses an optimizing method for optimization, the total number of crew required for flight services and a crew pairing model calculation unit for calculating a fitness of a solution. However Sato et al fail to teach creating variables and constraints, and therefor solving a mixed integer programming model, wherein said mixed integer programming model is comprised of an objective function with variables and constraints as recited in independent claims 40 and 41.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

a. Mikael et al (Scheduling Pilot Training) discloses a system for scheduling training for pilots.
